

VPG-Seminar WS 2017/18

Dienstags um 17.00 in C307, Theresienstr 41.

Date	Speaker	Title	Affiliation
17.10.17	Donja Aßbichler	Magmatic-carbothermal transition in cumulates from Laacher See Volcano, Eifel, Germany	<i>Ludwig-Maximilians-Universität (LMU) München</i>
24.10.17	Ana Silvia Casas	SO ₂ adsorption mechanisms	<i>Ludwig-Maximilians-Universität (LMU) München</i>
31.10.17		no seminar	
07.11.17	Janis Thal	Mapping Hot Springs & Volcanoes in the Manus Basin, Bismarck Sea, Papua New Guinea	<i>University Bremen / MARUM</i>
14.11.17	Gilles Seropian	An experimental study of magmatic Rayleigh-Taylor instabilities	<i>University of Bristol, UK</i>
21.11.17	Peter B. Larson	Yellowstone Hot Springs: Thermal and Mass Fluxes in a Large Hydrothermal System	<i>Washington State University, USA</i>
28.11.17		no seminar	
05.12.17	Alik Ismail-Zadeh	Direct and Inverse Problems in Models of Lava Flow	<i>KIT, Karlsruhe</i>
12.12.17		no seminar	
19.12.17		no seminar	
26.12.17		Weihnachten	
02.01.18			
09.01.18		no seminar	
16.01.18		no seminar	
23.01.18	Pierfrancesco Dellino	The rate of sedimentation from turbulent suspension: an experimental model with application to pyroclastic density currents and hazard implications	<i>Università di Bari, Italy</i>
30.01.18	Pascal Richet	A history of pressure - from antiquity to multi-anvil and diamond-anvil cell experiments	<i>IPGP Paris, France</i>
05.02.18	David Sasse	Experimental milling of olivine: Implications for Ascent and eruption	<i>University of British Columbia, Canada</i>
06.02.18	Bernie Wood	The volatile depletion trend of the Earth and its relationship to element volatilities and activities in silicate melts	<i>University of Oxford, UK</i>
